## NOTES

Passenger side floor water leak found and corrected.

Leak was from A/C accumulator condensation in blower motor housing.

Drain in housing was plugged with gunk.

Blower motor housing would fill with water and eventually spill over into the cabin air filter housing above

the passenger side floor.

This is why there wasnt water pooling on floor until driven for a couple hours with A/C running.

Condensation now drains as it should to the outside of the vehicle.
